WORK EXPERIENCE

Gigbei

Bhilai, CG

React Native Developer

Jun 2024 - Present

- **Led end-to-end mobile app development** as sole React Native developer, delivering cross-platform solutions using React Native and Expo.
- **Developed complex UI components and animations** with seamless user experience, enhancing engagement and retention rates.
- **Implemented push notification system** using expo-notifications for real-time user engagement and improved app retention.
- **Optimized app performance** through various optimization techniques resulted in improved performance and app launch times in low end devices.
- **Scaled application to 300+ active monthly users** while maintaining high performance across iOS and Android platforms.
- **Managed complete development lifecycle** from requirements analysis to app store deployment independently.
- **Collaborated with stakeholders** to translate business requirements into technical solutions and feature implementations.

Hackshade Technologies Pvt Ltd

Raipur, CG

Frontend Developer Intern

Jan 2023 - June 2023

- **Developed responsive web applications** using HTML, CSS, Bootstrap, and JavaScript, ensuring cross-browser compatibility.
- **Built mobile-first responsive websites** that adapt seamlessly across devices, improving user accessibility by 25%.
- **Collaborated development team** to implement new features, debug issues, and deliver projects within deadlines.
- **Gained proficiency in full-stack technologies** including PHP and MySQL for backend integration and database management.

PROJECTS

Carlust (React Native expo) - Gigbei

[Store Links](#)

- **Architected and developed** a full-featured car rental application from concept to deployment, handling the entire mobile development lifecycle.
- **Implemented robust navigation system** using React Navigation with nested navigators for seamless user flow across booking, payments, and profile sections.
- **Integrated advanced state management** using Zustand with persistent data caching via AsyncStorage for offline functionality.

- **Optimized performance** through react native optimization techniques like FlashList implementation, which reduces render times.
- **Integrated secure payment gateway** enabling real-time booking transactions and automated rental confirmations.

Gigbei Landing Page

[Live Link](#)

- **Developed a modern company website** using Next.js with server-side rendering for improved SEO and performance.
- **Built dynamic content management system** using MDX files for blog posts and project showcases, enabling non-technical team updates.
- **Implemented responsive design** with optimized loading speeds and modern UI/UX principles for enhanced user engagement.
